

## Agnes side table Kay + Stemmer

The Parnham School trained duo Kay+Stemmer have designed a new version of the popular freestanding shelves Agnes. This version is a low three-shelf unit, ideal as a beside table or for small hallways. It is made from solid oak or walnut. Agnes comes “out of the box” as a solid one piece item, with no assembly required. The design has the hallmarks of classical furniture-making training; details include radius edges, a gentle upwards taper and perfect proportion. Available in oak or walnut. Made in the EU.
