

Eadie armchair

Donna Wilson

Like all successful armchair designs, Eadie mixes comfort with function by embracing contemporary form whilst referencing tried and tested characteristics from the past. Made in the UK at SCP's factory in Thetford, Eadie is structured with a European hardwood frame, jute webbing and Hessian straps. In replacement of petrochemical materials such as rubber and foam, SCP's upholsterers use a mix of sustainable materials that include natural fibres, horse hair and wool to cover the frame. Eadie has a large full feather upholstered cushion that sits neatly within the rounded frame and turned beech legs with a gentle taper. The back of the frame gently arcs, creating a crescent shape to make the chair more accommodating whilst keeping a low profile. Made in the UK.
