

## Lincoln three seat sofa

Lucy Kurrein

SCP

A particularly comfortable design that has a high back for extra support. It is made with an FSC approved beech frame, zig-zag springs, jute and elasticated webbing and then covered with a mix of renewable materials that includes natural fibres, animal hair and wool. The Lincoln is a piece that brings together a formal sensibility with a softened curvaceous look. It has a deep-lying seat and elongated front section, which makes the design very comfortable. With a hand-pleated back detail and black powder-coated steel legs it is available as a sofa system to allow for L-shaped configuration. Made in Norfolk, England.

three seat sofa W208 x D92 x H87 cm
