## UNITABLE

A dynamic and interacting collection

Unitable is a system that can be changed at any time because it is built around a single structural element - an extruded aluminium beam - that can be used for one individual table or combined with other transverse beams. It also functions as a housing for cables.

Versatility and flexibility are key features of the Unitable system. The individual but common components create the ability to conceive tailored solutions of any shape or dimension in order to meet requirements without limitation. Added to this versatility is the availability of a wide range of finishes and colours, in laminate, glass or veneer. Unitable: total freedom.

## HIGHLIGHTS\_1

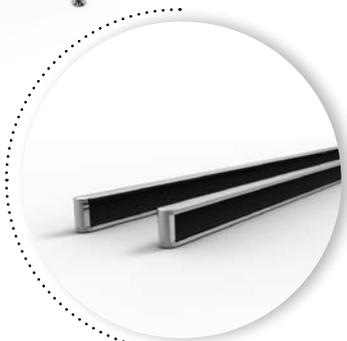

### Beams

- › extruded aluminium beam, polished finish.
- › available in lengths from 117 mm to 1836 mm.

### Legs

- › die-cast aluminium leg, polished finish.

### PMMI technical band

- › black decoration placed lengthwise.

### Connectors

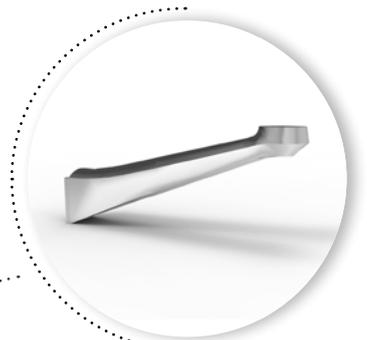

- › in black painted metal.
- › connectors allow the beams and bases to be joined at various angles, to make numerous configurations.

## HIGHLIGHTS\_2

### Top support

- › plastic material, black color.
- › height adjustable.

### Single bracket

- › die-cast aluminium, polished finish located along the beam.
- › supporting brackets for the tops can be placed in any position along the main load-bearing beam.

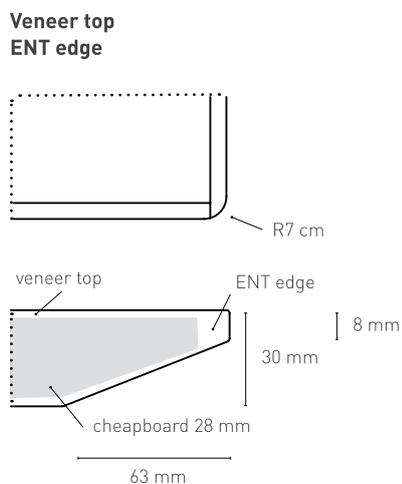

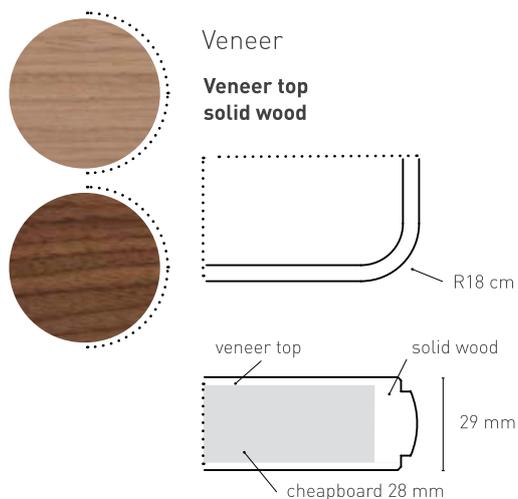

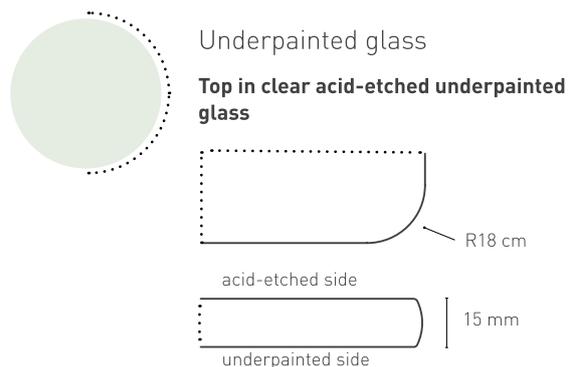

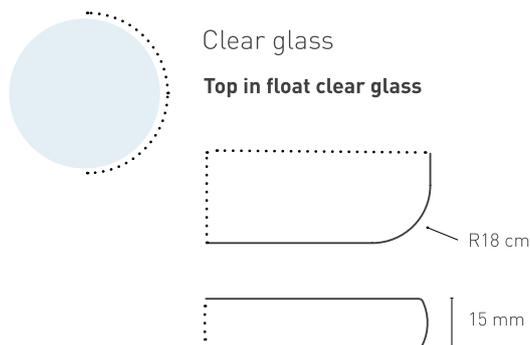

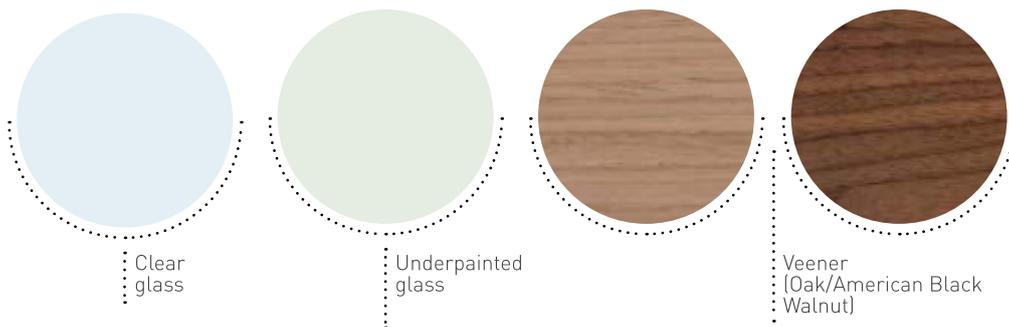

### Glides

- › in chromed plastic material.
- › height adjustable for the positioning of the table.

## FINISHES

### Tops

Tops are available in different shapes and finishes, and are made in various modular dimensions. Transparent glass, thickness 15 mm, with shaped edges and rounded corners; underpainted glass (in white), thickness 15 mm, with sanded finish on the side resting on the frame; in veneer with solid wood or ENT edges, thickness 30 mm.

## ELECTRIFICATION

**Grommets**  
In black painted metal,  
diam. 8 cm.

**Cable tray**  
Painted metal, black color.

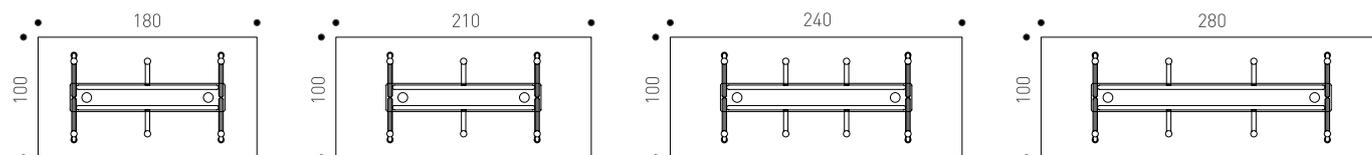

**Vertical cable duct**  
Plastic material,  
transparent or black color.

## DIMENSIONI
