

## Wire Tough

### Technical features

colour	: 2601-2607
production method	: tufted
pile material	: 70% new wool, 30% Tencel®
pile height	: 25 mm
pile weight / m2	: 3300 gram
total weight / m2	: 4500 gram
number of colours	: 7
maximum size without seams	: 500 cm width, length unlimited
cleaning	: professional cleaning recommended
design	: Studio Linse

### Durability

Wool has a natural elasticity and is also naturally resistant to dirt.

Tencel® inhibits bacteria growth

Wire Tough has been tested by Tüv Rheinland and is suitable for private and contract market.

Suitable for castor chairs.

This rug can be used with under-floor heating, unless it is a wall to wall rug.

### Fire safety

Wire Tough made of 70% pure new wool, which is naturally flame retardant.

### Sustainability

Tencel® is 100% biobased and has been awarded the prestigious USDA Certification for Sustainability.

### Maintenance

- It is important to vacuum your rug at least once a week to prolong its durability. The most effective way to remove dirt and dust is with the furniture cleaning attachment provided with your vacuum cleaner. A vacuum cleaner with a standard nozzle tends to remove less dirt and dust.
- Never use a rotating vacuum brush on this quality; this will permanently damage your rug.
- Vacuuming a new rug will produce fluff, but this is temporary. This fluff does not affect the quality of your rug.
- The ideal air humidity for wool is around 50%. Please note that if the air humidity is below 50%, the material becomes dry and its natural elasticity will decrease.
- In order to prevent wool from drying out, we recommend misting your woollen rug with water regularly.
- If rubber soles are frequently walked over a Wire Tough rug, it will wear quicker, especially if rotating or shifting movements are consistently made in one place.
- In order to prevent heavy use on one particular location, we recommend turning your rug around once in a while.

Due to our use of natural materials, slight colour differences may occur.
