

Turner, the new seating system designed by the designer Hannes Wettstein, combines comfort with refinement. Balanced volumes, controlled proportions, and a modern yet timeless look, characterise the design. Settees in various sizes, corner pieces, chaises-longue and pouf can be combined together to create different furnishing solutions. Molteni pays particular attention to the choice of leathers used to cover its products. They must have superior properties of softness and resistance to wear. *Turner* responds to varying needs in terms of comfort and posture, thanks to an easy mechanism which adjusts the depth of the seating. *Turner* is an excellent solution to the problem of how to combine elements thanks to a design logic based on modularity for traditional sofas, compositions with chaises longues and daybed islands.

■ Dimensions

End units, central units, chaise longues and islands

Elements **cannot be used individually**.
All elements have back with mechanism.
The compositions are always closed at the side with an arm.

Corner

The corner element **cannot be used alone** but must be placed by a central, terminal or corner element, on the opposite side to the arm. The corner element comes with mechanism only on the long side.

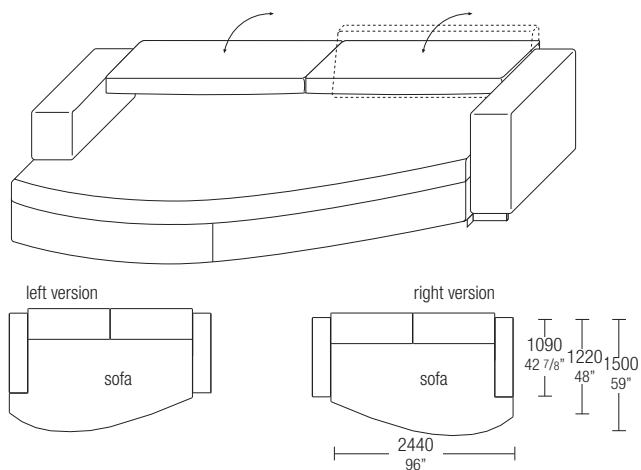

Island element

The island element cannot be used alone, but must be used along with a central, end or corner element on the side opposite the armrest.

Sofa

The settee is a finite element which stands alone
